The World's Largest Materials Society

ASM World Headquarters, Cleveland, Ohio, USA

ASM International connects materials professionals with the finest resources available — to solve problems, improve materials performance, and support professional development.

Mission: To gather, process, and disseminate trustworthy peer-reviewed materials information and knowledge globally through education, networking, and professional development for members, organizations served by our members, and the materials and manufacturing communities.

Vision: To serve as the leading resource for the global materials community.

IN EVERY ISSUE

Technology Developments and Business News covers Additive Manufacturing; Metals, Polymers, Ceramics; Testing; Characterization; Nanotechnology; Process Technology; Energy Trends; Sustainability; and Emerging Technologies.

Research Tracks reports on the latest R&D initiatives taking place across the industry, universities, and government labs.

Machine Learning covers cutting edge advances and applications of artificial intelligence in materials science and engineering.

In-depth Feature Articles discuss areas of interest to materials science and engineering professionals.

3D PrintShop provides information on technology advancements in additive manufacturing.

ASM News covers breaking news about ASM members, chapters, events, awards, and other society activities.

ADVANCED MATERIALS & PROCESSES (AM&P) MAGAZINE

The industry leading technical magazine for materials professionals.

Advanced Materials & Processes® (AM&P) is the flagship technical magazine from ASM International, the world's largest society for materials scientists and engineers. AM&P is packed with materials engineering content for a highly engaged readership of ASM members. The 20K+ ASM members (who are AM&P readers) are materials scientists, engineers, managers, professors, and technicians across every field of materials science who make decisions and recommend products.

67% of AM&P readers indicated they took an action (visited a website, bought products, etc.) based on the advertisements in AM&P.

Signet AdStudy®

PRIMARY JOB FUNCTION OF AM&P READERS

READERS INVOLVED IN THE RECOMMENDATION, APPROVAL, OR PURCHASE OF ANY OF THE FOLLOWING PRODUCTS OR SERVICES:

Metals.....	61%

DIGITAL EDITION SPONSORSHIPS

AM&P Magazine's digital edition provides your company with additional exposure and presents you with the opportunity to be an issue's primary sponsor. Connect to our readers in two ways — a **full-page ad** adjacent to the front cover and a **banner ad** featured prominently at the top of the digital edition notification email. Don't miss the opportunity to boost brand awareness as an AM&P digital edition sponsor.

PACKAGE PRICING

PRICING OPTIONS START AT ONLY \$700

An integrated combination of ASM products can help you reach the greatest number of prospects for the lowest cost. Call to discuss how volume buying and bundled packages can give you the greatest impact.

ELECTRONIC DEVICE FAILURE ANALYSIS (EDFA) MAGAZINE

The quarterly publication on semiconductor failure analysis.

Electronic Device Failure Analysis™ (EDFA™) is a quarterly technical resource for the modern failure analysis professional. Each full color issue features technical articles, microelectronics failure analysis trends, products and announcements, case studies, and more. EDFA is the primary member benefit for the Electronic Device Failure Analysis Society (EDFAS), an ASM Affiliate, and has an audience of over 1000 industry professionals.

DO YOU HAVE A STORY TO TELL?

Our audience of highly engaged materials professionals is listening. Advertorials give marketers the opportunity to tell their story in a longer format than a traditional advertisement. The Electronic Device Failure Analysis Society's flagship technical magazine, EDFA, makes sharing your story both easy and extremely effective. Discreetly labeled as "sponsored content," your company can highlight its capabilities and points of difference, share a customer success story, or provide a detailed application example. All we need is 500 words, your logo, and a couple of images and captions. Our editorial and design team will create the layout and then return it to you for review and approval. Advertorial materials are due one week before ad close date. advertise@asminternational.org.

ADVERTORIALS ARE AN IDEAL WAY TO SHOWCASE:

- Interesting case studies
- Customer success stories
- Uniqueness of your products or services
- Historical profile of your company
- New capabilities and services
- Future plans and direction of your organization

FOR ALL EDFA AND AM&P MAGAZINE ADS:

MECHANICAL REQUIREMENTS (WEB-OFFSET)

- Publication Trim Size: 8.125" x 10.875"
- Keep important illustrations and type at least .375" from trim edge and .625" from binding edge.
- 133 line screen / 300 dpi

ELECTRONIC SPECIFICATIONS

Advertisements should be submitted electronically via the following:

- Formats: High-resolution PDFs or InDesign files
- Graphics / Images: TIFF, JPEG or EPS format (CMYK), high-resolution (300 dpi).

BINDING AND PAPER STOCK

- Perfect bound
- Stock is white, coated enamel

1/10TH PAGE ADS MECHANICAL SPECIFICATIONS

Please provide approximately 50 words of typewritten copy about your company, featured product, service, or website, along with a company logo, brochure, or photograph. High-resolution digital files are preferred; see Electronic Specifications for details. Layout is included in the advertising rate.

CLASSIFIED ADVERTISING

ASM has several ways to advertise your classified ads.

EDFA Magazine

- Advertise your open position, used equipment or general information within EDFA Magazine. Please contact us for specs and pricing.

ASM Career Center

- Post your job or internship listing using the ASM Career Center. This is an online, self-service model that allows you to select your package directly online. Visit the Career Center at careercenter@asminternational.org.

Classified advertising does not count toward general advertising frequency and is not agency commissionable (billed gross).

Copy and Contract Regulations

The publisher reserves the right to decline or cancel any advertisement at any time. Advertisements which in the judgment of the publisher attempt to create the illusion that they are editorial matter shall carry the word "Advertisement" at the top. Advertiser and its advertising agency, jointly and severally, agree to indemnify, defend, and save harmless the Publisher, its employees and agents from any claims, actions, expenses, or losses, based on or arising out of anything contained in such advertising, including the unauthorized use of any person's name or photograph or of any sketch, map, words, labels, trademarks, or copyrighted material, obscene language, libelous statements, invasion of privacy, or anything unlawful, in connection with advertising purchased according to the terms of this rate card.

DEVELOPING HIGH TEMPERATURE MATERIALS

Testing at temperatures up to 2000°C is essential for designing materials that can handle the heat.

Metallic and ceramic high-temperature materials represent a fundamental area of research within the energy and transportation industries. The overall efficiency of power plants and aircraft turbines depends on the performance of these materials. Testing these materials is of critical importance to ensure their performance, and one of the leading manufacturers of testing systems for high temperature materials is ZwickRoell.

For energy conversion systems with single-cycle operation (e.g., steam or gas turbine power plants and internal combustion engines) as well as in multi-cycle systems (e.g., gas and steam turbine combined power plants), higher thermal efficiencies and thereby lower CO₂ emissions can only be achieved by increasing process temperatures and pressures. This also applies to aircraft turbines.

Traditional metallic and ceramic materials—such as those used in compressors, turbines, combustion chambers, and boilers—must be further developed and improved. Metallic materials are increasingly subjected to corrosive loading at elevated temperatures due to the atmosphere in which they operate. Therefore, it is vital that the materials are protected. One approach is to form a passivation layer through the material itself. In the high temperature range, oxides from chromium (Cr₂O₃, up to approximately 900°C), aluminum (Al₂O₃, up to approximately 1500°C) and silicon (SiO₂, up to approximately 1800°C) are best suited for use as protective coatings.

High-temperature tensile test on metal specimen with induction heating.

Testing system with high-temperature carousel (four furnaces).

Optimized materials development requires a thorough understanding of the correlation between chemical compounding, microstructures, mechanical properties, and long-term stability. To ensure the economical use of costly high-performance materials, material characteristics under practical loading must be determined, e.g., tensile loading, fracture mechanical behavior, creep, fatigue, and thermo-mechanical fatigue. Models for durability forecasting under complex loading also must be calculated.

Thermomechanical Testing

High temperature tests (e.g., tensile and flexure tests) are used to determine the thermal-elastic behavior, heat resistance, and recrystallization temperature of materials. It is common practice to install the high temperature unit (up to 2000°C) directly in the materials testing machine. This arrangement allows tensile tests to be performed at both room temperature to ISO 6892-1 or ASTM E8, and at elevated temperatures to ISO 6892-2 or ASTM E21. During room temperature testing, components such

as the high temperature furnace and extensometer are simply swiveled out of the test area.

Testing systems from ZwickRoell feature optimal coordination of furnaces including temperature controllers, correct specimen grips for tensile and flexure tests, and the appropriate extensometer. With the videoXtens (up to 1200°C) video extensometer and the laserXtens (up to 1800°C) based on the laser speckle principle, ZwickRoell offers two noncontact measuring solutions ideally suited to high-temperature tensile testing. These systems offer distinct advantages, particularly when used with sensitive specimens at high temperatures in air or vacuum environments. The combination of furnace volume, temperature tolerances and hold times specified in the standard, and heating and cooling times determine the testing duration.

Zwick / Roell

For more information on high temperature materials testing systems, contact ZwickRoell at 770.420.6555 / www.zwickroell.com.

2027 EVENT CALENDAR

Showcase your thought leadership and innovations at one of ASM's 2027 conferences and expositions, which offer unparalleled access to highly engaged audiences of industry leaders and decision-makers.

FAS SUMMIT ON FAILURE ANALYSIS & PREVENTION FEBRUARY 2 – 4, 2027 | OCEANSIDE, CALIFORNIA

A gathering dedicated to advancing the science and practice of failure analysis. This summit's theme is "When Materials Meet Their Environment: Understanding Environmentally-Assisted Failures." Learn from leading experts and engage in meaningful discussion—all while contributing to the growth of this critical field.

INTERNATIONAL THERMAL SPRAY CONFERENCE AND EXPOSITION (ITSC)

MAY 12 – 14, 2027 | ROTTERDAM, NETHERLANDS

ITSC is the world's foremost international conference and exhibition for thermal spray technologists, researchers, manufacturers, and suppliers. This conference rotates between North America, Europe, and the Pacific Rim and is organized by the ASM Thermal Spray Society, the German Welding Society (DVS), and iiw.

SHAPE MEMORY & SUPERELASTIC TECHNOLOGIES CONFERENCE AND EXPOSITION (SMST)

MAY 19 – 20, 2027 | HEREDIA, COSTA RICA

The International Conference on Shape Memory and Superelastic Technologies (SMST) is the leading worldwide conference and exposition for the shape memory and superelastic technologies and is highly focused on the manufacturing and application of shape memory materials. Join us for Costa Rica's first Nitinol conference!

AEROMAT MAY 25 – 27, 2027 | PALM SPRINGS, CALIFORNIA

AeroMat focuses on innovative aerospace materials, fabrication, and manufacturing methods that improve performance, durability, and sustainability of aerospace structures and engines with reduced life-cycle costs.

11TH INTERNATIONAL CONFERENCE ON ADVANCES IN MATERIALS, MANUFACTURING, AND REPAIR FOR POWER PLANTS JUNE 7 – 11, 2027 | TUCSON, ARIZONA

The Electric Power Research Institute (EPRI) is pleased to continue its partnership with ASM for its 11th Advances in Materials Conference building on EPRI's initial event in 1987 and rotating between the UK, Europe, North America, and the Pacific. The Conference covers the latest advancements for conventional thermal power generation.

INTERNATIONAL MATERIALS, APPLICATIONS, AND TECHNOLOGIES (IMAT)

OCTOBER 4 – 7, 2027 | COLUMBUS, OHIO

IMAT, ASM's annual event, is the only targeted event on advanced materials, applications, and technologies in key growth markets that focus on economic trends and business forecasts. The event will include a diverse group of materials experts, including the ASM Programming Committees, AeroMat Committee, and all six of ASM's Affiliate Societies, who are heavily involved in building the technical symposiums, focused on real-world technologies.

HEAT TREAT 2027 OCTOBER 4 – 7, 2027 | COLUMBUS, OHIO

Discover the unrivaled opportunities awaiting you at Heat Treat 2025 Conference and Expo in Detroit! As the LARGEST gathering for heat treating professionals, materials experts, and industry leaders in North America, HeatTreat is a MUST-ATTEND event!

NORTH AMERICAN COLD SPRAY CONFERENCE (NACSC) OCTOBER 5 – 6, 2027 | COLUMBUS, OHIO

This conference is a biennial gathering hosted by the ASM Thermal Spray Society. NACSC serves as a dynamic platform for professionals from diverse backgrounds to come together and gain invaluable insights into the rapidly evolving field of cold spray technology. Renowned experts from around the world converge to share their expertise, unveiling the latest advancements, innovative applications, and groundbreaking research.

INTERNATIONAL SYMPOSIUM FOR TESTING AND FAILURE ANALYSIS (ISTFA)

OCTOBER 31 – NOVEMBER 4, 2027 | PHOENIX, ARIZONA

ISTFA is the only North American event devoted to the semiconductor, electronic sample preparation, and imaging markets. ISTFA offers the best venue for failure analysts and the FA community for sharing challenges and acquiring the technical knowledge and resources needed to take them on.

NAVIGATING A GREENER SKY NOVEMBER 2027 | LIMOGES, FRANCE

This special symposium is a key event for the aerospace industry, bringing together researchers, manufacturers, and suppliers to focus on developing sustainable solutions through advanced thermal spray and PVD coatings.

2027 EVENT SPONSORSHIPS

Amplify your brand's visibility at one of ASM's 2027 industry targeted conferences and expositions.

EVENT WEBSITE ADS

Ensure your brand is prominently showcased on ASM's event websites, offering unparalleled visibility with targeted industry audiences.

[\[LEARN MORE ON PAGE 13\]](#)

REGISTRATION SPONSORSHIP

Position your brand front and center at event registration, offering an exclusive opportunity to place your logo and messaging at the first touchpoint for attendees, ensuring maximum visibility and a lasting impression.

EVENT NETWORKING RECEPTION & SOCIAL EVENTS

Draw attention of potential customers to your brand during the event's most anticipated and well-attended gatherings.

- CONCEPT #1 - SPONSOR LEIS, A PHOTO BOOTH, OR ENGAGING LUAU AT HAWAIIAN EVENT
- CONCEPT #2 - PROVIDE BRANDED REUSABLE CUPS, GUITAR PICKS, OR APPAREL AT EVENT CONCERTS

MOBILE APP SPONSORSHIP

Build or enhance brand reputation with banner ads and push notifications in the app that guides the audience's event experience.

EMERGING PROFESSIONALS COMPETITIONS

Visibly associate your brand with the future of the materials industry at one of many high-energy competitions!

BRANDED ITEMS

Amplify your brand by placing your logo on key items used by attendees, such as badge holders, lanyards, registration bags, and more.

TECHNICAL SESSIONS

Position your brand as a thought leader by showcasing your logo in promotion materials and event signage for technical sessions or workshops, keynote or panel, User Group, and more.

SHOW GUIDE SPONSORSHIP

Feature your brand or products in print and/or digital guides where attendees explore the event, seek solutions, and plan their schedules.

CUSTOM FEATURE TOWERS

Create demand for your products and services with eye-catching towers strategically placed in high-traffic areas to drive maximum exposure as attendees navigate an event.

Pricing varies based upon each sponsorship opportunity, event, and audience size.

AMPLIFY YOUR REACH ON ASM'S CONFERENCE AND EXPOSITION PAGES

Drive increased exposure by advertising on ASM International's industry event and exposition pages, including high-traffic events such as:

AeroMat is where aerospace leaders converge to discuss innovations in materials engineering within the industry

This conference is focused on the rapidly evolving field of cold spray technology, bringing together renowned experts in the industry

International Materials, Applications, and Technologies (IMAT) is the industry's premier event for materials experts and organizations

Heat Treat is the largest gathering for heat treating professionals, materials experts, and industry leaders in North America, a MUST-ATTEND event.

The *International Symposium for Testing and Failure Analysis* has served as the leading event for the microelectronics failure analysis community for 50+ years

ADDITIONAL 2027 CONFERENCES & EXPOSITIONS:

- FAS Summit on Failure Analysis & Prevention
- Shape Memory and Superelastic Technologies Conference and Exposition (SMST)
- Navigating a Greener Sky
- TSS Open Mic Series

Learn more about these events on **page 11** or visit asminternational.org/events

Advanced Materials & Processes (AM&P) eNews provides monthly advancements and the latest updates in the metals and materials industries.

HTPro eNews provides cutting edge heat treating editorial content from around the industry.

TSS eNews offers tips and updates on thermal spray and surface engineering technologies.

FAS eNews provides updates on failure analysis tools and community information.

EDFA eNews offers monthly information on improving performance of devices and materials for the electronic device failure analysis industry.

eElastic eNews delivers announcements and news about memory materials, applications, and the SMST Society.

Sliplines eNews provides information on the art and science of metallography, as well as materials characterization.

86% of AM&P eNews readers use, purchase, recommend, and implement products and services in the materials science industry.

34% of all subscribers are not ASM members — additional audience reach of 11,500 subscribers.

82% of all subscribers have directly purchased products or actively researched purchasing products as a direct result of reading the AM&P eNews.

**Based on a media research/readership study by Z-Squared Media.*

eNEWSLETTER AD TYPES

2027

PRIMARY SPONSORSHIP

Only ONE primary sponsorship is available for each AM&P eNews – which means your message stands out. Your large format rectangle is featured prominently “above the scroll” on the eNews.

PRODUCT SPOTLIGHT

Submit 75 words and one image for a Product Spotlight, which is a great way to showcase your new products, innovations, and company updates.

VIDEO SPONSORSHIP

Capture the attention of your target audience through engaging videos in a eNews Sponsored Video Showcase. These video sponsorships are the **NUMBER ONE** clicked item within each newsletter!

TILE AD SPONSORSHIP

Drive exposure and generate leads with a 150x150 tile ad with a customizable call-to-action to drive traffic directly to your landing page.

PRICING VARIES BASED UPON EACH eNEWS PUBLICATION AND AUDIENCE SIZE

PACKAGE PRICING

An integrated combination of ASM products can help you reach the greatest number of prospects for the lowest cost. Call to discuss how volume buying and bundled packages can give you the greatest impact.

Did you know?

ASM's Education courses can be sponsored!

Drive exposure to your brand and capabilities with these unique audiences seeking to advance their skills and accelerate innovation in their organizations.

Sponsor in-person and virtual courses such as "Nitinol for Medical Devices" and other Self-Study or Digital Short formats.

WE'RE MORE THAN JUST AN ADVERTISING PLATFORM...

2027

EMPOWERING YOUR SUCCESS

One of the keys to success is knowing your audience. We understand that as a marketer or sales leader, you may not have the materials science and engineering background to understand your customers' pain points and how to intersect them with your organization's value proposition.

WE'RE HERE TO HELP!

ASM provides a variety of resources to bridge the gap and empower your success!

EDUCATION & TRAINING

Advance your materials science and engineering acumen through ASM Education. Learn from industry experts in a variety of formats that suit your budget, schedule, and learning style.

LAB & CLASSROOM: Hands-on learning that takes place on-site at ASM headquarters in our state-of-the-art training labs and classrooms.

VIRTUAL: Benefit from direct interaction with an expert ASM instructor without needing to invest and consume time in traveling.

SELF-STUDY: Online education courses which allow you to learn at your own pace in an independent study format.

DIGITAL SHORT COURSES: Shorter format, typically completed in ~2 hours, which offer visual guides, animations, and interactive quizzes.

EXPLORE OUR LIST OF EDUCATION OPPORTUNITIES AT:
