

FAS President's Award

The FAS President's Award shall recognize exceptional service to the FAS and the failure analysis community. Examples of such service includes, but are not limited to, committee service, service on the Board of Directors, organization of conferences or symposia, development of education courses and technical content, student and general public outreach. While any member of FAS is expected to further the Society's goals through service, this Award shall recognize those who provided an exceptional amount of effort in their service to the Society. The recipient is selected by the FAS President.

Recipients of the FAS President's Award

2025

Adam J. Boesenberg

Sr. Materials Engineer
Danfoss Power Solutions

Citation: "In appreciation of steadfast leadership of the FAS Programming Committee, marked by thoughtful incorporation of extensive feedback and tireless dedication to continuous improvement, all while excelling in the role of JFAP Editor. Your unwavering support and collegial spirit have made a lasting impact."

2024

Burak Akyuz, FASM

Vice President-Testing
Applied Technical Services Inc

Citation: "In appreciation for many years of distinguished service and commitment to the Failure Analysis Society, including leadership during the Affiliate Society transition; and continued contributions to symposia and ASM Handbooks."

2023

Jake Auliff

Senior Manager - Materials Engineering
Danfoss Power Solutions

Citation: *“In special recognition for your exemplary service and commitment to promoting materials science and the art of failure analysis through service, encouragement, and leadership.”*
