

**Christian Rueckert**

Head of Sustainable Technologies R&T, Airbus Engineering

Christian is heading Sustainable Technologies R&T within Airbus Commercial, with a focus on enabling technologies for zero emission flight, circular processing of metals, composites and chemicals along with tackling the overall challenge of reducing the eco footprint of materials processing.

Christian graduated from Stuttgart Technical University as an Aeronautical Engineer. His career within Airbus led him through various functions in manufacturing engineering, composites technologies and R&T. Christian also acts as technical advisor for institutes and research facilities and is member of a materials focused working group at BDLI (the German Aerospace Association).
